

MOULDS MAKING & ENGINEERING S.R.L.

P-DCPD, POLYURETHANE, PLASTICS MOLDING TECHNOLOGIES

Ci-Esse mould making and enegineering S.r.l. was founded in 2013 , with a consultancy mission that complete our production activities , in order to offer to our customers a full service in a new international market .

Nowadays , in a strong international business approach , in order to get the time to market and the investment budget needs , the conditions to manage a project might have the necessities to execute , for instance, the product engineering in Brazil , the prototypes , mold making and molding trials in China , and the final production to customer's premise in Europe , with following logistic and custom practices .

We offer technical and language competences , that together with our supplier chains / partner / agents guarantee a prompt efficient and continuous activity , offering the following services :

- ✓ Investment analysis
- ✓ Product material choice and more appropriate technological solution to industrialize it .
- ✓ Prototypes development
- ✓ Co-Design 2D-3D and product engineering
- ✓ Project 3D and prototype / serial molds construction, suitable for different technologies, such as injection plastic , polyurethane , p-DCPD , vacuum forming , twin sheets forming , SMC/BMC , Die Casting , etc .
- ✓ Molding trials with molding cycle parameters analysis
- ✓ Product and molds dimensional reports
- ✓ Packing and logistic , included the custom practices .
- ✓ Bank charges , money exchange
- ✓ International contract manage
- ✓ Guarantee and support , by our Italian production society , for all imported products in Eu .

Besides these services , always thanks to our suppliers chains and signed partnerships , we offer industrial equipment technical consultancy and purchase , such as :

- ✓ Hydraulic press machines
- ✓ Painting lines
- ✓ Injection foam ( Pu , p-DCPD ) machine

We usually can manage projects in different industry fields , as automotive ( car , motorbikes , agricultural machines ) , electro medical equipment , dental units , furniture , and all technical products in general , offering our long term experiences in searching for the most convenient solution , according to final customer's investments necessities .

Here following a presentation about our services :
